

To find networking information on a Mac, navigate to the Network Preferences panel.

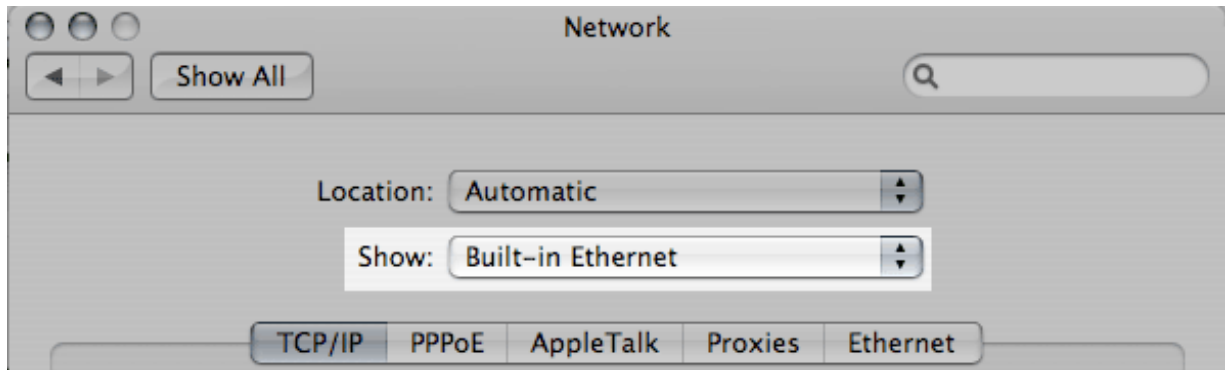

1. Go to the Apple Menu, then select System Preferences.

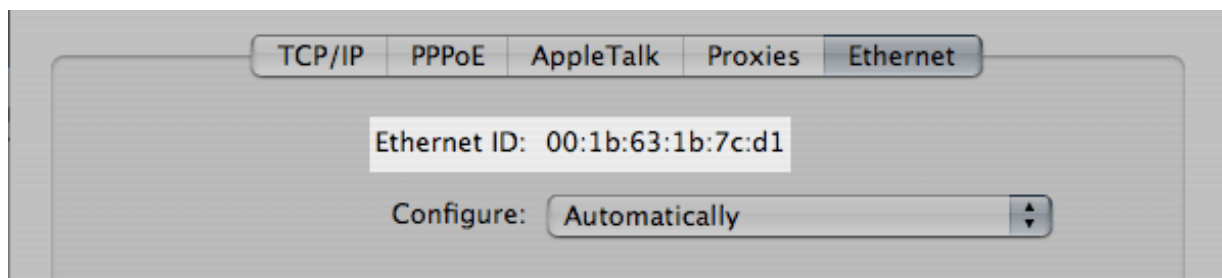

2. Click on "Network" in the System Preferences panel.

Under "Show:", select the network interface that you want the MAC address for. Generally, this will either be Built-In Ethernet or Airport.

To find the MAC address of the Ethernet card, click on the Ethernet tab.

To find the MAC address of the Airport card, click on the Airport tab.
